

6 AL/4V Titanium

Although we have supplied thousands of pounds of titanium to manufacturers throughout the world, we are pleased to offer a large inventory of non-certified sheet so the hobbieist can explore working with this space age material. Most of our titanium is American-made, line-stenciled aircraft quality material. If you require titanium with certification, prices will vary. Please call for a price quote.

The prices listed below are intended to be a guide for you to estimate costs. Sizes and prices may vary. Additional charges may apply for pieces over .100" thick as these require waterjet cutting. Be sure to inquire about large sheets for your own waterjet or laser cutting projects. If you require titanium with certification, prices will vary. Please call for a price quote.

Halpern Titanium enjoys working with customers new to titanium and there is no specific minimum order requirement. We can be reached at (413) 283-8627 or toll free in US or Canada at (888) 283-8627 or e-mail quotes@halperntitanium.com.
